technical performance

Fine porcelain stoneware is the result of a careful and meticulous process that begins with the selection of top-quality raw materials, which are then blended and processed with precision. The materials are then fired at extremely high temperatures, up to 1250 °C, in a process that ensures complete vitrification of the product. This production process gives porcelain stoneware its distinctive characteristics of exceptional hardness, strength and compactness, making it a reliable and long-lasting material. Fincibec Group's porcelain stoneware products are notable for their non-absorbent and frost-resistant properties, which make them ideal for use in environments exposed to moisture or temperature changes. Their high resistance to wear and mechanical stress makes them perfectly suited to a wide range of architectural applications, from interior design to public spaces. They guarantee excellent performance, long-lasting durability and provide versatile solutions for all design and renovation needs.

PERFORMANCE TECNICHE

Il gres fine porcellanato nasce da un attento e accurato processo di selezione di materie prime di altissima qualità, che vengono mescolate e lavorate con grande precisione. Successivamente, questi materiali vengono sottoposti a una cottura a temperature estremamente elevate, fino a 1250 °C, un procedimento che garantisce la perfetta greificazione del prodotto. Questo processo di produzione conferisce al gres porcellanato le sue caratteristiche distintive di eccezionale durezza, resistenza e compattezza, rendendolo un materiale affidabile e durevole nel tempo. I prodotti in gres porcellanato di Fincibec Group si distinguono per le loro proprietà di inassorbenza e ingelività, che li rendono ideali per applicazioni in ambienti soggetti a umidità o variazioni di temperatura. La loro notevole resistenza all'usura e alle sollecitazioni meccaniche li rende perfetti per essere utilizzati in molteplici ambiti dell'architettura, dall'interior design agli spazi pubblici, garantendo prestazioni eccellenti, una lunga durata nel tempo e offrendo soluzioni versatili per ogni esigenza di progettazione e ristrutturazione.

In&Out by Fincibec

In & Out by Fincibec offers the ideal solution for creating seamless continuity between indoor and outdoor spaces, shaping environments that are attractive, functional, and visually striking. This selection of innovative collections brings together design and performance in perfect balance, offering materials suited to the specific demands of each intended use, whether in residential, public or commercial settings. Thanks to the variety of surfaces available, each space can be customised and adapted to suit individual needs. For interiors, a choice of natural, honed or soft finishes brings warmth, elegance and refinement to living or working environments. For exteriors, grip surfaces are available in 9, 10 and 20 mm thicknesses, designed to ensure safety and resistance to the elements. This wide selection of surface options makes it possible to create spaces with a strong sense of design continuity, where every detail is considered and a feeling of harmony is achieved. To find out about all of Fincibec's In & Out continuity solutions, consult the catalogues on our websites.

In & Out di Fincibec rappresenta la soluzione ideale per garantire una perfetta continuità tra gli spazi interni ed esterni, creando ambienti gradevoli, funzionali e di grande impatto visivo. Questa raccolta di collezioni innovative combina sapientemente estetica e funzionalità, offrendo materiali che rispondono ai requisiti specifici di ogni destinazione d'uso, sia in ambienti domestici che in contesti pubblici o commerciali. Grazie alle differenti superfici disponibili, è possibile personalizzare e adattare gli ambienti secondo le proprie esigenze: per gli spazi interni, si possono scegliere tra finiture naturali, molate o soft, che conferiscono calore, eleganza e un tocco di raffinatezza agli ambienti abitativi o lavorativi. Per gli spazi esterni, invece, sono disponibili superfici grip in 9, 10 e 20 mm, pensate per garantire sicurezza e resistenza alle intemperie. Questa varietà di superfici permette di creare ambienti caratterizzati da una continuità progettuale avvolgente, valorizzando ogni dettaglio e favorendo un senso di armonia e coerenza. Per conoscere tutte le soluzioni di continuità In & Out di Fincibec consultare i diversi cataloghi di linea presenti sui nostri siti.

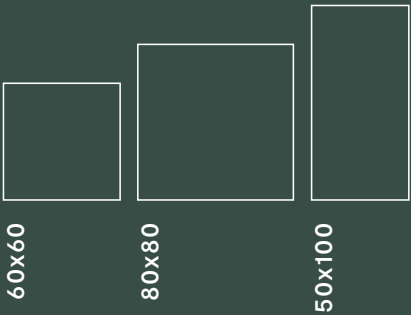

a complete range to meet every need

Fincibec Outdoor offers a wide selection of collections that are perfect for both residential and public spaces, thanks to their versatility. These surfaces help to create settings that are elegant and functional. To meet different installation requirements, they are available in thicknesses of 9, 10 and 20 mm, allowing the most suitable solution to be selected for each setting, including areas subject to heavy use. The collections come in a variety of sizes and include matching special pieces, designed to enhance the character of each surface and adapt to its specific use, ensuring a stylish result in every application.

20 mm thickness

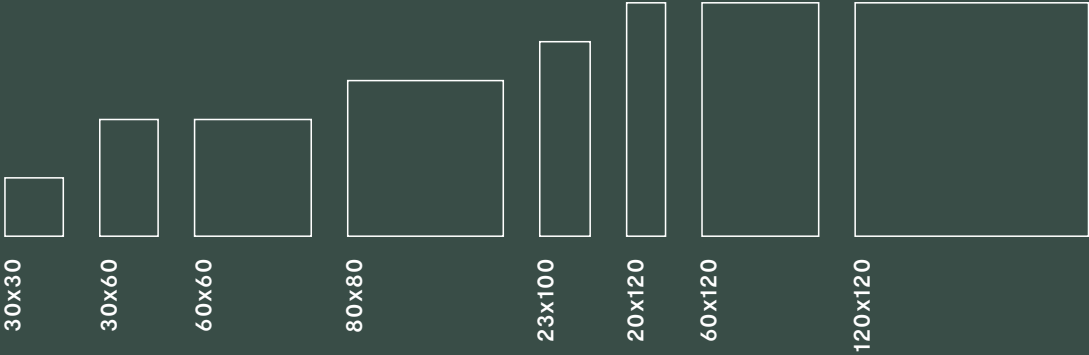

UNA GAMMA COMPLETA PER TUTTE LE ESIGENZE
Outdoor di Fincibec offre una vasta scelta di collezioni che, grazie alla loro versatilità, sono perfette sia per ambienti residenziali che per spazi pubblici, creando atmosfere eleganti e funzionali. Per soddisfare le diverse esigenze di installazione, le superfici sono disponibili negli spessori di 9, 10 e 20 mm, consentendo di scegliere la soluzione più adatta a ogni contesto, anche alle zone sottoposte a forte sollecitazione. Le collezioni si propongono in diversi formati e si completano con pezzi speciali coordinati, studiati per valorizzare le caratteristiche di ogni superficie e adattarsi alle specifiche destinazioni d'uso, garantendo il massimo dello stile in ogni applicazione.

10 mm thickness

9 mm thickness

outdoor

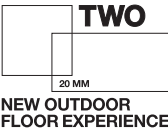

surface

Grip surface

The Grip 9, 10 and 20 mm surface offers the perfect balance of aesthetics, reliability, and safety, making it ideal for outdoor flooring, public and commercial spaces, and private walkways requiring specific performance criteria. Highly resistant to temperature fluctuations, frost, moisture and fire. It also ensures a high slip resistance performance, as well as excellent durability against stains, solvents, detergents and salt. Mould- and moss-resistant. Easy to clean. Fincibec's ISO 13006 Bla high-density porcelain stoneware maintains its integrity over time, ensuring that collections with multiple finishes provide seamless visual continuity between indoor and outdoor spaces.

La superficie Grip in 9, 10 e 20 mm è il giusto connubio tra estetica, affidabilità e sicurezza ed è idonea per la realizzazione di pavimentazioni delle aree esterne, degli spazi pubblici, commerciali e dei passaggi delle aree private dove sono richiesti requisiti specifici. Alta resistenza agli sbalzi termici, al gelo, all'umidità e al fuoco. Elevate prestazioni di resistenza allo scivolamento. Forte resistenza alle macchie, ai solventi, ai detergenti, al sale. Inattaccabilità da muffe e muschi. Facile pulibilità. Il gres porcellanato Fincibec ISO 13006 Bla, ad elevata greificazione ed inalterabile nel tempo, risponde nel modo migliore a tutte queste necessità garantendo inoltre per le serie con più finiture superficiali continuità visiva tra gli ambienti interni ed esterni.

20 mm

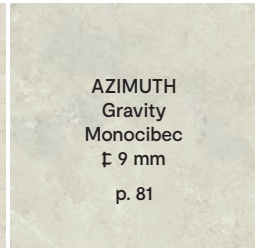

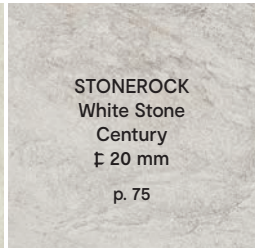

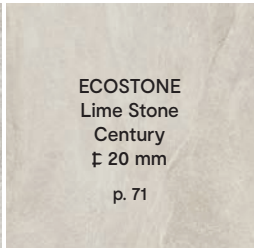

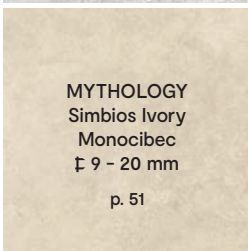

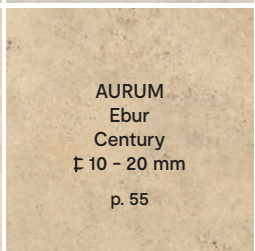

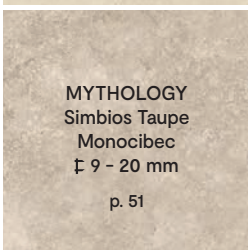

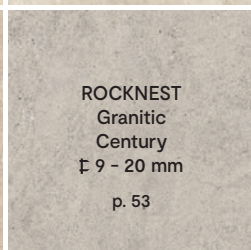

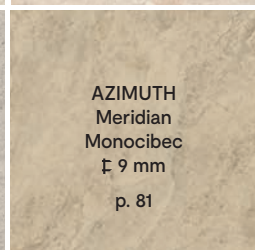

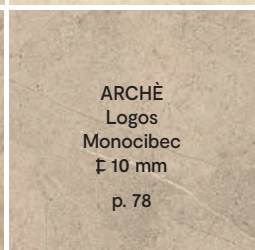

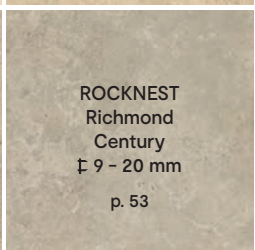

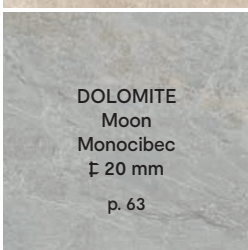

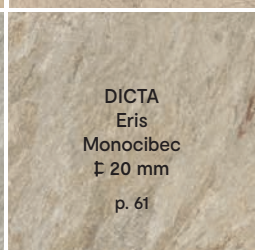

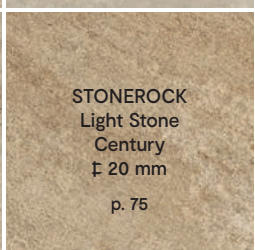

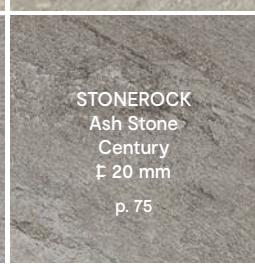

Two and Major are monolithic porcelain stoneware slabs with a 20 mm thickness, offering exceptional technical performance. They are ideal for outdoor paving in both public and private settings and are suitable for supporting high static loads. Both complemented by a wide range of specialised pieces, making it ideal for applications such as swimming pools and wellness areas, ensuring seamless continuity between indoor and outdoor spaces.

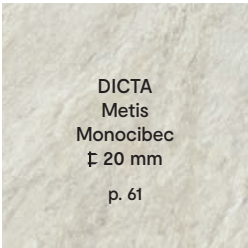

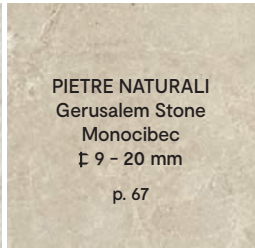

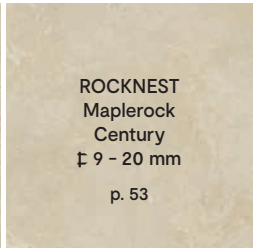

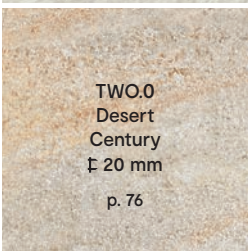

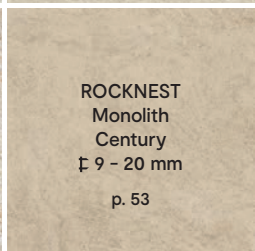

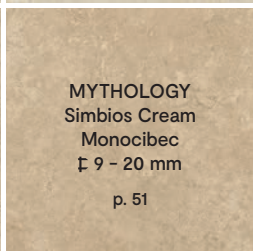

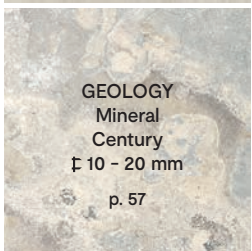

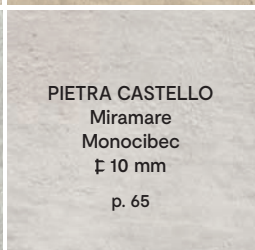

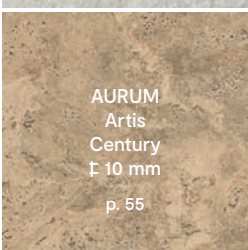

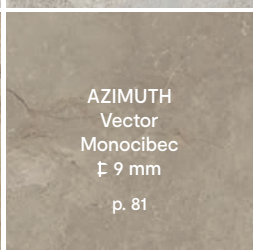

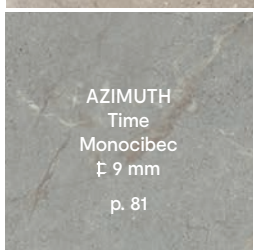

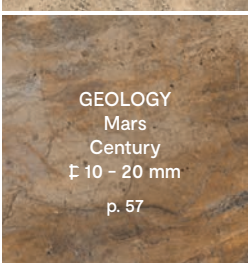

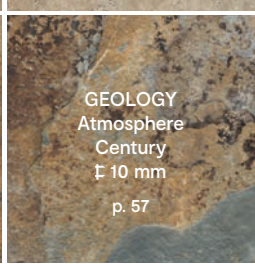

Two e Major sono lastre monolitiche di gres porcellanato, in spessore 20 mm, con prestazioni tecniche eccezionali, ideali per pavimentazioni esterne sia pubbliche che private, idonee a sopportare notevoli carichi statici. Entrambe sono corredate da una ricca gamma di pezzi speciali, perfetti per applicazioni come piscine e zone wellness, garantendo una continuità spaziale tra interno ed esterno.

Major / Two 80x80 31.5"x31.5" Rect. 	9 Supports/slab (6,3 Supports/mq) 9 Supporti/lastra (6,3 Supporti/mq)	9 Supports/slab + double fiberglass mesh (6,3 Supports/mq) 9 Supporti/lastra + doppia rete in fibra di vetro (6,3 Supporti/mq)	Please contact Fincibec Group Si prega di contattare Fincibec Group
Major / Two 50x100 20"x40" Rect. 	6 Supports/slab (4 Supports/mq) 6 Supporti/lastra (4 Supporti/mq)	6 Supports/slab + double fiberglass mesh (4 Supports/mq) 6 Supporti/lastra + doppia rete in fibra di vetro (4 Supporti/mq)	Please contact Fincibec Group Si prega di contattare Fincibec Group

notes | note

The supports-per-mq calculation covers only central slabs (excludes borders, corners and site-specific conditions). For a more accurate estimate, please contact the Fincibec Engineering Department. The raised floor is not suitable for vehicular traffic.
L'incidenza dei supporti per mq riguarda solo le lastre centrali (esclude bordi, angoli e condizioni di cantiere). Per una stima più precisa, contattare l'Ufficio Engineering Fincibec. Il pavimento sopraelevato non è idoneo al traffico carrabile.

double fiberglass mesh | doppia rete in fibra di vetro

Installation of raised flooring over 2 cm in height is not recommended without applying a double layer of fiberglass mesh to the underside of the tiles. This system retains any fragments in the event of accidental breakage, enhancing the safety of the flooring.
Si sconsiglia di realizzare pavimentazioni sopraelevate con altezze superiori a 2 cm senza l'applicazione di una doppia rete in fibra di vetro sul retro delle lastre. Tale sistema trattiene eventuali frammenti in caso di rottura accidentale, migliorando la sicurezza della pavimentazione.

the standard | la normativa

the standard | la normativa

To date, there are no standards relating to raised outdoor flooring. The only standard that can act as a reference is UNI EN 12825, which specifies the features and performance requirements of raised floorings mainly intended to used inside buildings. TWO and MAJOR meets the requirements of this standard (listed in the following table). With regard to the “Dynamic load - shock-proof test against hard bodies”, Fincibec recommends choosing the material according to the intended use and using structures that are maximum 100 mm high.

Ad oggi non esistono norme relative alle pavimentazioni sopraelevate da esterno. L'unica norma cui si può fare un certo riferimento è la UNI EN 12825 che specifica caratteristiche e requisiti prestazionali dei pavimenti sopraelevati il cui principale uso previsto è quello all'interno degli edifici. TWO e MAJOR soddisfano i requisiti di tale norma (elencati nella tabella seguente). Relativamente al test di “Carico dinamico - prova d'urto di corpi duri” Fincibec raccomanda la scelta del materiale in base alla destinazione d'uso, consigliando comunque l'utilizzo di strutture di altezza non superiore ai 100 mm.

TYPE OF TESTS TIPO DI TEST	TEST RESULT ESITO DELLA PROVA
Static load - Load test on the element Carico statico - Prova di carico sull'elemento	Test passed Test superato
Vertical loading test on column Prova di carico verticale sulla colonna	Test passed, as declared by the support supplier Superamento test dichiarato dal fornitore del supporto
Permanent deformation test on the element Prova di deformazione permanente sull'elemento	Test passed Test superato
Dynamic load - Shock-proof against hard bodies Carico dinamico- Prova di urto corpi duri	Test not passed Test non superato
Dynamic load - Shock-proof against soft bodies Carico dinamico- Prova di urto corpi morbidi	Test passed Test superato
Length of the panel sides Lunghezza dei lati del pannello	Test passed Test superato
Panel orthogonality Ortogonalità del pannello	Test passed Test superato
Straightness of the sides Rettilinearità dei lati	Test passed Test superato
Panel thickness Spessore del pannello	Test passed Test superato
Panel warpage Svergolamento del pannello	Test passed Test superato
Vertical bending of the panels Incurvatura verticale dei pannelli	Test passed Test superato

warnings | avvertenze

should a heavy object fall on a ceramic tile laid on a raised surface, there is a risk of the tile breaking and injuring people in the vicinity. To avoid injury, it is important to follow the instructions of the designer and the use of the double fiberglass mesh on the back of the slabs is recommended. Since outdoor paving tiles could be lifted by the wind, the producer recommends that plans to lay tiles on raised surfaces be checked by a qualified engineer to ensure they are fit for purpose, thus avoiding the risk of harm to people or property. qualora un oggetto pesante cada su una lastra ceramica posata su un sistema sopraelevato c'è il rischio di rottura della stessa provocando danni a chiunque possa sostare o transitare nelle vicinanze. Per evitare dunque danni alle persone è importante seguire le istruzioni fornite dal progettista e si consiglia l'utilizzo della doppia rete in fibra di vetro sul retro delle lastre. Il produttore raccomanda di far verificare l'idoneità del sistema di posa in quota da un tecnico abilitato, in quanto le lastre delle pavimentazioni da esterno potrebbero essere sollevate dall'azione del vento, evitando così il rischio di danni a persone o cose.

A minimum slope of 2% is recommended to ensure proper water drainage. Due to the surface tension of water and the non-absorbent nature of porcelain stoneware, localized water pooling may occur even when the installation is performed according to best practices. Si consiglia una pendenza minima del 2% per garantire il corretto deflusso dell'acqua. A causa della tensione superficiale dell'acqua e dell'inassorbenza del gres porcellanato, è possibile che si verifichino ristagni localizzati, nonostante una posa eseguita a regola d'arte.

100% CERAMICS OF ITALY

These logos demonstrate a precise geographical location of origin and a way of running a business enterprise with the highest ethical and cultural values. The products made by Fincibec Group are wholly designed, developed and manufactured in Italy. Each collection is designed and checked in the group's three R&D laboratories and all the subsequent production stages are carried out exclusively in Italian facilities with Italian technology. By using the above-mentioned logos, the aim of Fincibec Group is to identify a work philosophy which, with the utmost respect for the environment and man, leads to the production of materials adhering to the highest standards of performance and aesthetics through the best use of all the resources available. Fincibec Group adheres to the 'Made in Italy' code of ethics promoted by the Italian industrial ceramics association, 'Confindustria Ceramica', and is committed to full transparency on the origin of its products market with the brand.

Questi loghi testimoniano una precisa indicazione geografica di provenienza ed un modo di fare impresa legato ai più alti valori etici e culturali. I prodotti realizzati da Fincibec Group sono completamente ideati, studiati e fabbricati in Italia. Ogni collezione viene progettata e verificata nei laboratori di ricerca e sviluppo del gruppo e tutte le successive fasi produttive sono realizzate esclusivamente all'interno di stabilimenti italiani con tecnologia italiana. Fincibec Group vuole identificare una filosofia di lavoro che, nel massimo rispetto dell'ambiente e dell'uomo, porti alla realizzazione di materiali secondo i più elevati standards prestazionali ed estetici attraverso l'ottimizzazione di tutte le risorse impiegate. Fincibec Group aderisce al codice etico sul Made in Italy promosso da Confindustria Ceramica con il quale tutte le aziende aderenti si impegnano alla massima trasparenza riguardo l'origine dei prodotti apponendovi il marchio.
